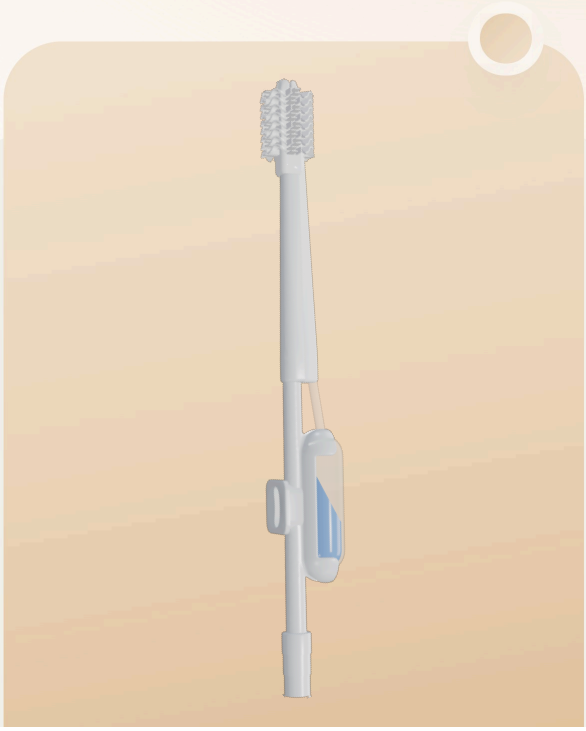
24H ORAL HYGIENE KIT

B-Care Oral Care

An Innovative Approach to Oral Care



MECHANISM

A soft 360 degree brush, a 4 ml pipette of mouthwash in the handle and an integrated suction channel: the mouthwash goes straight to the brush head, and the suction takes it away, all in one hand.

Brush	**360 degree, soft TPE**
Brush head	**16 × 18 mm**
Fluid	**4 ml pipette, mouthwash**
Dosing	**Thumb on the pipette**
Suction	**Integrated, thumb control**
Connection	**Medical suction unit**
Length	**178 mm**
Patients	**Intubated adults**

APPLICATION

1. **Fill**
   Fill the 4 ml pipette with mouthwash.
2. **Insert**
   Place it in the cradle, the tip in the fluid inlet.
3. **Connect**
   Attach the handle to the medical suction unit.
4. **Clean**
   Press the pipette with the thumb and gently brush.

Every 8 h
one cleaning

3 packs
one blister, 24 hours

BENEFITS

- **360° soft, rubber-like (TPE) brush: easy access to the patient's mouth**
- **Disinfectant-moisturizing fluid stored in handle, dispensed via brush tip**
- **Simple tracking of 24-hour oral hygiene protocol**
- **Single-hand fluid usage**

> **Toothbrushing is an essential practice** for ventilated adults (SHEA/IDSA/APIC 2022).
