

Press Release

Airway Medix Announces Leadership Transition as Anna Aranowska-Bablok Steps Down as CEO

Warsaw, July 1, 2026 – Airway Medix S.A., a MedTech company listed on the Warsaw Stock Exchange focused on clinical airway management solutions, announced that Anna Aranowska-Bablok will step down from her role as President of the Management Board (CEO), effective 31 August 2026.

Anna has led Airway Medix for 12 years, a period in which the Company raised more than EUR 3 million in investment capital, built a qualified European team, and moved its R&D, production, and regulatory work to Europe. Under her leadership, Airway Medix also completed a significant shift from a research-focused organization into a commercially driven business, bringing its first product to market in early 2026.

"This decision closes an extraordinary chapter of my professional life. It has been a privilege to serve Airway Medix for the past twelve years, working alongside a team that never stopped believing in what we were building," said Anna Aranowska-Bablok. "I'm proud of what we've achieved together, and I'm confident Airway Medix is in the strongest position of its history to keep moving forward."

In her resignation statement, Anna emphasized that stepping down as CEO does not mean stepping away from the Company. She will continue to support Airway Medix's operations in Poland and remains engaged in the Company's long-term strategy, including the continued development of its product portfolio.

This transition is part of the broader direction the Company has already shared with shareholders – one focused on building a more internationally connected leadership structure to support Airway Medix's next stage of growth. The recent addition of new Supervisory Board

members brings further international experience to the Company, aligned with this same direction. The Company will share more on its management structure in due course.

Airway Medix thanks Anna for her twelve years of leadership and dedication and looks forward to her continued involvement with the Company going forward.

About Airway Medix S.A.

Airway Medix S.A. focuses on the research, development and commercialization of innovative disposable devices for mechanically ventilated patients in Intensive Care Units (ICUs), as well as life-threatening patients and anesthesiology departments. The products offered by Airway Medix address the most pressing clinical needs and fill a gap in current medical devices.

Airway Medix Solutions:

- **B-Care Oral Care** (Oral Cleaning System) – a comprehensive system for maintaining the oral hygiene in intubated and immobilized patients.
- **Cuffix – Cuff Pressure Regulator** – a system for monitoring and maintaining constant cuff pressure in endotracheal and tracheostomy tubes in intubated patients.
- **Closed Suction System** – a system for cleaning the endotracheal tube in mechanically ventilated patients.
- **Innovative Laryngeal Mask** – medical device, used to maintain airway patency in unconscious patients and in anesthesiology, R&D stage product.

Airway Medix S.A. has been listed on the Warsaw Stock Exchange since 2014.
